

Measurement instructions for ...

WASZP European Championships – Mar Manor

The measurement process is supposed to be fair to all, quick and easy for you and efficient but effective for the VOLUNTEER measurers.

You can not Register until you have Measured.

Boat Preparation:

1. Check everything complies with the class rules; including rigging guide and its addendum
2. Remove all covers; boat, foils, mast and sail (place covers off tramp)
3. Rear foil not fitted; front foil glued together (either in boat or on tramp)
4. Have your helmet and PFD available for inspection (remember whistle)

Engaging a Measurer

Measurers may wear orange shirts in the boat park. During Open Measurement periods please approach a Measurer to get your boat measured (no booking required).

Measurement takes place in your boat's normal spot in the boat park.

Measurement Sessions

See the regatta schedule of events.

On the day before the first scheduled racing:

- Open measurement will take place up to 12 noon
- After lunch, measurement will be possible by appointment only. This means you must have pre-agreed a specific time with a specific measurer.
- Boats are not to go sailing on this day, unless they have completed measurement [NP, DP].

Keep an eye out for pop-up Open Measurement opportunities (especially during the Spanish Nationals). These and any further instructions may be communicated via the event Whatsapp group.
